20 April 1981

W9YT EXPO 1981
University of Wisconsin
Madison, WI 53706

Dear Dan,

I thoroughly enjoyed our EXPO contact on 11 April. Over the years I have occasionally gotten back to the campus, but this was my first visit via ham radio.

I was on the campus in the years from 1936-42 as an EE in the reign of Prof. J.W.Watson (JW^2). Kurt Wendt was a memorable prof in the CE department under Mort Withey. In those days our EE department was headquartered in the old ME building out on University Ave.

I was a ham in those days----W90ZQ---also, but so far as I know there was no on-campus ham club then. And certainly noooobody would have been able to use computerized logging for such a club! Just didn't have the hardware.

Keep those Badger electrons squirting off your antennas, and I'll be looking for you about this time next year!

P.S. I'll be looking for the certificate.
P.S.S. Should you see Dean Wendt please extend to him my wishes for his continued good health.
